

## Environmental Policy

### Policy statement

- Tadiran Batteries will take all necessary steps to prevent environmental (ecological) hazards and pollution, to minimize the environmental impacts arising from the processes at the plant and the products it provides, to protect the environment and will act to save resources.
- The company attaches great importance to cooperation with the authorities dealing with the environment at the local, national and international level to fully comply with environmental legislation, standards, regulations and the required conditions.
- The principle of environment conservation will be an integral part of the company's products development processes and shall be implemented in the production processes.
- Development of environmental awareness through instruction and training of the company's employees while striving for continuous improvement within the framework of the company's overall program.

### Ways to implement the policy

- Establishment and implementation of an environmental management system and continuous improvement.
- Setting achievable goals and objectives for environmental performance and their continuous improvement over time.
- Identifying aspects and environmental impacts and allocating resources to handle them. Use of the most appropriate technologies and monitoring production processes to reduce them.
- Increasing employees' environmental awareness and imposing responsibility for the implementation policy on every one of the company's employees in their field of occupation.
- Continuous study of developments and innovations in environmental in the global industry and in the appropriate authorities, as well as innovations, changes and updates in the adjustment obligations and the required actions implementation to comply with them.
- Tadiran Batteries is part of TotalEnergies, and as such, it engages in learning from the parent company's practices, as well as sharing information, insights, and opportunities. This is done with the aim of promoting excellence, streamlining processes, and strengthening organizational learning
- Environmental policy and its components as well as information on environmental impacts and potential risks to employees' public. In addition, it will be available for stakeholders as well.
